

ULTRASOUND SOFT MARKERS of ANEUPLOIDY

Summary: The SA PPG: Ultrasound Soft Markers of Aneuploidy has recently been updated. It will support the *Fetal Anomaly Screening* PPG currently in development, including the specific recommended testing, counselling and referral guidance.

INFORMATION RE REVISED PPG: *Ultrasound Soft Markers of Aneuploidy*

This PPG has recently been updated. It will support the *Fetal Anomaly Screening* PPG currently in development with the following changes included:

- Table with likelihood ratios for recalculating the risk of Trisomy 21 (T21) based on their First Trimester Screen result or age-related risk
- Table with specific recommended testing, counselling and referral guidance
- Broader discussion of each soft marker
- Link to online algorithm for recalculating risk of T21 in presence of multiple soft markers.

The SA PPGs are available on the SA Health website: www.sahealth.sa.gov.au/perinatal and the SA Health web-based App called *Practice Guidelines* available at: <https://extapps.sahealth.sa.gov.au/PracticeGuidelines>
